TARIK ALANSARI

Master of Data Analytics (AI) | Western University

tansari7@uwo.ca | (226) 582-7018 | tarik-alansari | Tansari2004 | diacare.health

TECHNICAL SKILLS

Programming: Python, SQL, Java, C++, C#, Dart
ML & Data Pandas, NumPy, PyTorchscikit-learn, TensorFlow, Matplotlib, Jupyter
Databases: PostgreSQL, MongoDB, Firebase/Firestore
Development: FastAPI, Flask, REST APIs, Flutter
Tools: Git, Docker, GitHub Actions, Google Cloud

EDUCATION

Master of Data Analytics (MDA) — Artificial Intelligence Specialization — Graduating August 2027
Western University

Bachelor of Science — Double Major in Computer Science and Mathematics — Sept 2022 – Jun 2026
Western University

PROFESSIONAL EXPERIENCE

Founder & Software Developer, Riwaq For Software LLC — Aug 2026 – Present
Amman, Jordan

- Founded RIWAQ to develop DiaCare, a diabetes health app shaped by patient and healthcare professional feedback
- Secured a pharmacy partnership with a signed revenue-sharing agreement for pharmacist support and paid consultations
- Worked with Jordan's Ministry of Health to clarify guidance on medication support, referrals, and healthcare services

Warehouse Systems Engineer Intern, Flag Matrix — Aug 2023 – Aug 2024
Mississauga, ON

- Coordinated a 3-person team to implement a barcode inventory system, improving product tracking and restocking
- Implemented Excel/VBA tools to optimize warehouse layout, reducing search time by ~30% and freeing ~12% of shelf space

Data Science & Mobile App Development Intern, Health & Happiness Pharmacy — May 2023 – Sep 2023
Amman, Jordan

- Trained Logistic Regression and XGBoost models to predict missed refills, helping improve on-time refills by ~10–15%
- Developed a customer loyalty system that automatically tracks purchases and awards points, still in use at the pharmacy
- Created Python forecasting models for 800+ products, helping reduce out-of-stock products by ~25%

PROJECTS

Hospital Patient Flow & Capacity Analytics — Python, SQL, Power BI — Expected Oct 2026

- Analyzed hospital data to identify trends in patient wait times, admissions, and bed availability
- Created demand forecasts and a Power BI dashboard to predict busy periods and support hospital planning

Financial Crime Investigation & Transaction Risk System — Python, PostgreSQL, Power BI — Aug 2026 – Sep 2026

- Developed a Python/PostgreSQL system to rank suspicious transactions using risk rules and Isolation Forest
- Created explainable risk scores and an interactive Power BI dashboard to help identify and prioritize high-risk transactions

AI Food Recognition & Meal Logging — Python, PyTorch — May 2026 - Aug 2026

- Developed a deep learning system to recognize foods from meal photos and reduce manual meal logging
- Optimized the model for faster, lower-memory predictions and integrated it into DiaCare using FastAPI and Docker

DiaCare – Diabetes Management Platform — Jan 2025 – Aug 2026

- Built a Flutter/Firebase health app for diabetes and weight management, including booking, check-ins, and pharmacist dashboards
- Developed an NLP triage model using Python, TF-IDF and Linear SVM to classify patient messages by urgency and support category
- Validated with 5-fold cross-validation and a 20% holdout set, then deployed with Docker and FastAPI

LEADERSHIP & ACTIVITIES

Founder & President, Jordanian Cultural Club, Western University — Sep 2024 – Present

- Led a team to grow the club to 150+ members and secure $3K in sponsorships through 10+ pitches and campus partnerships
- Collaborated with sponsors, university groups, and club members to organize cultural and networking events for 100+ attendees

CERTIFICATIONS

IBM Data Analyst Professional Certificate — IBM — Expected Nov 2026
